Solution-oriented AI Engineer with over 2 years of experience in AI and data analytics projects. Demonstrated ability to lead cross-functional teams in delivering innovative solutions leveraging advanced machine learning, deep learning, and cloud technologies. Skilled in designing end-to-end automation pipelines and developing AI-driven solutions across various sectors, achieving up to 80% efficiency improvements in client workloads.

WORK EXPERIENCE

EY India • New Delhi • 02/2023 – 04/2025
Associate Consultant • Full-time

PROJECTS

Digitization of Academic Record Sheets • 08/2024 – 02/2025

- The client sought to preserve old physical academic reports for easy access and future reference.
- Our team led the digitization effort by creating an end-to-end automation pipeline, using Python for data extraction, processing, and database integration, and leveraging Azure AI Document Intelligence for OCR. This solution has allowed the client to maintain legacy reports with data accuracy sustainability exceeding 88%.

Asset Product Management for Electricity Company, KSA • 03/2024 – 08/2024

- The electricity company aimed to track the performance and health of their electrical assets.
- We have collaborated with EY MENA on data assessment and cleaning using Pandas to ensure accuracy and alignment with the predefined data model. This facilitated asset performance analysis, predictive analytics, and dashboard creation, enabling the prediction and measurement of asset management costs for the client and stakeholders.

AI driven Telecom Tower Monitoring System • 10/2023 – 05/2024

- The client requested an AI solution to be integrated with their existing application to track the construction of telecom towers across various regions of India.
- Developed an algorithm to estimate tower heights from images and implemented a YOLOv8 deep learning model to detect machinery in telecom tower images. These features were integrated into the existing system using FastAPI, enabling real-time monitoring of telecom tower construction progress throughout India.

EDUCATION

B.Tech in Computer Science Engineering

JIS University
Kolkata, West Bengal, India

GPA: 9.38

08/2019 – 07/2023

Gold Medalist for academic excellence

AWARDS & ACHIEVEMENTS

Client Extraordinaire
11/2024

EY India

EY Data Scientist Bronze Badge

06/2024

EY India

JIS Puroshkar and JIS Academic Award for outstanding academic performance

07/2024

JIS University

SKILLS

Programming & Automation::

Python, SQL, Pandas, SQL, NumPy, Jupyter Notebook, VSCode, Git, Linux.

Cloud & AI Technologies::

Azure, Azure AI Document Intelligence, OpenAI GPT-4, Google Cloud Vision, Bhashini API, Gemini, Azure VMs

Learning Path with GenAI • 01/2024 – 02/2024

- Client aims to create a personalized LMS module that presents their courses in a more accessible and relevant way for users.
- Integrated OpenAI's GPT-4 and Bhashini to develop a streamlined solution for customized knowledge retrieval from PDFs based on user-selected topics. The user experience was further enhanced with multilingual support via the Bhashini API for text-to-speech conversion. This PoC showcased the GenAI capability for low-cost LMS management and highlighted its value for individual users.

Forgery detection in HealthCare • 07/2023 – 09/2023

- The client seeks a system to track patient medical reports and detect fraudulent activities in hospitals across Hyderabad.
- Implemented a comprehensive web-based solution incorporating advanced AI modules for forgery detection in healthcare documents, leading to a 75% improvement in accurate verification rates.

PUBLICATIONS

System and Method for Automatic Real-Time Recognition of Visitors from Plurality of Images at the Door-Step

05/2023

EasyChair – RAICCIT, 2023

Ref.No.: IGEN 858

This invention is related to an automated face recognition system that recognizes the faces of people with potential applications in houses, offices, universities, VIP offices, and door access management and alerts the person.
